

# Press Release

To: **All Media Partners**

Date: **17 May 2011**

Subject: **Internet Solutions Mozambique wins prestigious award**

An independent study was conducted in January to March 2011 by PMR.africa, a prominent consulting firm from South Africa. The study on Mozambique was not commissioned research but a PMR.africa initiative. The study covered all the major industry sectors in the country, and respondents were not prompted to rate a company. PMR.africa mentioned business sectors and it was up to the respondents to then nominate a company against a set of criteria.

The respondents comprised 150 CEO's, MD's, owners of companies, company directors, senior employees and senior local and national government officials. A company or institution cannot "enter" the process or ask to be nominated. The research process is based on a spontaneous nomination and rating by the respondents.

The ratings are based on the perceptions of the respondents. The criteria used were the following:

- Companies/institutions that have done most to enhance economic growth and development of the country
- Levels of management expertise
- Implementation of corporate governance
- Brand awareness
- Levels of innovation

Based on this evaluation, INTERNET SOLUTIONS MOZAMBIQUE was rated the best Internet service provider in the business category (highest rated in sector), with an overall score of 4.30 out of a possible 5.00. For this distinction, Internet Solutions will receive the coveted Diamond Arrow Award at an awards ceremony on 23 May 2011 in Maputo.

### **About Internet Solutions Mozambique (ISM)**

Internet Solutions Mozambique is a premier service provider to the business community and public sector in Mozambique. ISM's core product offering comprises Communication, Carrier, Cloud and Connectivity services through all of Mozambique, with the Customer as the focus point of all strategies.
